Tax-Deductible Construction Education Investment!

Your state licensing board is proud to announce the launch of a tax-deductible opportunity for you as a contractor to

invest in the education of your industry's future leaders and project managers. Act 352 (House Bill 1420) of the 2004 legislature goes into effect for calendar year 2005. The act allows the contractor, in the course of renewing a contractor's license, to choose to donate additional funds to a specified public university within Louisiana that offers an accredited, degreed program in the field of construction management. Any such donated funds received by the university shall be used solely for the benefit of its construction management program.

Therefore, all 2005 renewal applications will include an opportunity for contractors to donate any amount allowable by the Internal Revenue Service (Restrictions may apply – please discuss with your tax planner.) to one of three currently accredited universities in Louisiana. They are Louisiana State University - Baton Rouge, University of Louisiana - Monroe, and Louisiana Tech - Ruston.

HOW DOES IT WORK?

The donor contractor files for renewal of his Louisiana contractor's license with the Board. The Louisiana State Licensing Board has been designated as each university foundation's collecting agent for contributed funds from Louisiana contractors. The Board, as collecting agent for the university foundation, will issue the required contemporaneous written acknowledgment of the gift to the donor as proof of donation to meet Internal Revenue Service's reporting guidelines. At the end of each calendar year, the Louisiana State Licensing Board will undergo a formal legislative audit of its receipts and operation within 150 days after the close of the fiscal year. Upon receiving the verified and audited financial statements from the Legislative Auditor, the Board will disburse the total designated amount to each university. Please note that separate investment accounts will be opened so that both the principal invested and the interest earned will be disbursed to the appropriate university foundation along with a list of donors. The Board charges no fees for handling the transactions.

Construction is a \$10 billion (\$10,000,000,000) industry in Louisiana and its economic ripple effect yields significant dollars for Louisiana jobs and economic development.

The Board regulates the construction activities of the following construction trade organizations and the public at large:

Louisiana Associated General Contractors
National Electrical Contractors Association
Louisiana American Subcontractors Association
Louisiana Oilfield Contractors Association
Louisiana Business League

Associated Builders and Contractors
Louisiana Mechanical Contractors Association
Louisiana Asphalt Paving Association
Louisiana Homebuilders Association

The Board takes this opportunity to thank the various construction trade organizations, the Louisiana Legislature, and Governor Kathleen Blanco for working together to ensure that the "partnership" among industry, education, and government supports the infrastructure necessary to train our construction workforce of tomorrow. We encourage your participation in this voluntary and optional election to donate to the educational institution of your choice.
